OBJECTIVE

Full-Stack Software Engineer with 3+ years of experience building scalable, production-grade web applications using Angular, TypeScript, Node.js, and Express. Strong in business logic development, API design, and asynchronous architectures. Experienced in delivering end-to-end features—from Angular UI to backend services, queues, and databases. Known for solving performance-critical problems using event-driven systems (AWS SQS, Redis), optimizing APIs, and improving system reliability. Recognized as a Star Performer for owning and delivering complex, business-critical modules. Adaptable, fast learner, and comfortable working across unfamiliar systems and technologies.

SKILLS

Programming Languages	JavaScript, TypeScript, Python (DSA, scripting), SQL
Frontend	Angular, React, HTML5, CSS3, RxJS, NgRx, Redux
Backend	Node.js, Express.js, RESTful APIs, Asynchronous & Event-Driven Systems
Databases	Cassandra, MySQL, MongoDB
Backend Infrastructure	Redis (Caching, Messaging), AWS SQS, CloudWatch
Computer Science Fundamentals	Data Structures, Algorithms, Object-Oriented Design
Development Practices	Agile/Scrum, Git, CI/CD (basic), Code Reviews, Debugging, Unit Testing
AI-Assisted Development	GitHub Copilot, Cursor, ChatGPT (code analysis, testing, refactoring)
Tools	Docker, Git, Postman, Chrome DevTools, JIRA, Linear
Soft Skills	Problem Solving, Adaptability, Learning Mindset, Ownership, Communication

EXPERIENCE

Software Engineer Nov 2023 – Present
ZeroNorth (Formerly Alpha-Ori Pvt Ltd), Chennai, India

- Delivered end-to-end features for maritime products **SmartVoyager** and **SmartShip**, building Angular UIs integrated with Node.js backend services.
- Developed reusable Angular components and services using TypeScript and RxJS, ensuring maintainable and scalable frontend architecture.
- Designed and implemented asynchronous backend workflows using AWS SQS for XML generation and message processing, improving system scalability and reliability.
- Reduced critical workflow processing time by **40%** by redesigning synchronous logic into an event-driven, queue-based architecture.
- Improved observability and debugging by integrating structured logging and monitoring with AWS CloudWatch.
- Optimized API response time from **24ms to 2ms** using Redis caching for frequently accessed data.
- Took full ownership of a complex, business-critical module and was awarded **Star Performer** for successful delivery.

Software Engineer Trainee Apr 2023 – Nov 2023
ZeroNorth (Formerly Alpha-Ori Pvt Ltd), Chennai, India

- Built full-stack web features using Angular, Node.js, Express, and MongoDB.
- Gained hands-on experience with REST API integration, debugging, and Agile development workflows.

PROJECTS

AI Resume Analyzer (Personal Project)
Tech Stack: React, Vite, Node.js, Express, Firebase, Firestore, Groq LLaMA3, Render, Vercel

- Built an AI-driven platform that analyzes resumes, calculates ATS scores, identifies skill gaps, and aligns resumes with job descriptions.
- Designed React-based UI and API-driven workflows, strengthening hands-on React experience beyond Angular.
- Integrated Groq LLaMA3 for intelligent analysis and deployed scalable frontend and backend services.

Smart Verification System for Media Files
Tech Stack: Django, MySQL, Solidity

- Developed a blockchain-based system to verify the authenticity of media files.

Student Fee Management System
Tech Stack: Django, MySQL

- Automated student fee collection and record management for educational institutions.

EDUCATION

B.Tech in Computer Science and Engineering, College of Engineering, Kallooppara — 2019 – 2023
Percentage: 84.4%

Higher Secondary (12th), St. Peter's HSS, Kurumpanadom — 2017 – 2019
Percentage: 95%

Secondary School (10th), St. Peter's HSS, Kurumpanadom — 2017
Percentage: 100%
